NEW TECHNICAL BOOKS PUBLISHED IN TBILISI

The Tbilisi Scientific Research Institute of Installations and Hydroelectric Power Engineering has published a book by Ye. E. Mikhol'son, senior scientific worker of the Institute and Candidate in Sciences, entitled Onory elektricheskikh lini iz tsentrifugirovannogo zhelezobetona (Electric Line Poles of Centrifuged Reinforced Concrete).

The poles described by the author are durable, do not need repairs, save steel, and can replace wooden or steel poles in many cases. The new-type supports have been installed on some of the Georgian electric transmission lines.

Parts No 17 and 18 of the Sbornik trudov Tbilisskogo instituta inzhenerov zheleznodorozhnogo transporta (Collected Works of the Tbilisi Institute of Railroad Transport Engineers), devoted to the physical principles of metal cutting, have just been published. The new book has 736 pages. The greater part of it was written by scientific workers of the Institute. The book also contains articles by noted specialists, such as Stalin laureate, Prof I. M. Besprozvanny, professors A. V. Pankin, and S. S. Rudnik, and others.
